Delta Variant & Rise of COVID-19 Cases

The industry has seen a dramatic increase in COVID-19 cases in the past few weeks and we need everyone's help to minimize the spread of the virus.

Specifically, we ask that you:

- **Get Vaccinated:** The most important thing you can do to protect yourself, your family, your community, and your brothers and sisters is to get vaccinated.
- **Wear a Mask When Indoors:** Wearing a mask will protect those around you from infection. COVID-19 is spread from person to person by respiratory droplets, which are largely projected when you cough, sneeze, and talk.
- **Stay Home When Sick:** Stay home and away from others when you're not feeling well.
- **Get Tested:** Get tested as soon as possible if you were a close contact (within 6 feet for 15 minutes or more within 24 hours) with someone who is positive
- **Immediately Report Suspected Cases or Positive Test Results:** Notify PMA by calling (562) 495-7697 and contact your Union representative to notify them of your condition and inform them of the first day your symptoms appeared.
- **Wash Your Hands:** Wash your hands often with soap and water for at least 20 seconds. If soap and water is not available, use hand sanitizer with at least 60% alcohol.

Thank you for doing your part to help keep yourself, your family, your community, and your brothers and sisters safe!
